

Motorola Employees CU Signs Deal With CRIF Lending

Credit Union Journal Daily Briefing | Thursday, June 28, 2012

SCHAUMBERG, Ill. — Motorola Employees CU has signed with CRIF Lending Solutions to implement the company's CRIF ACTion origination system.

By offering users end-to-end, automated processing of loans and accounts, while also connecting with a wide variety of core, document, appraisal, electronic signature and other essential lending systems, CRIF said its ACTion system streamlines the lending process and serves as a financial institution's hub for decision making.

"We selected ACTion largely based on its flexibility and powerful rules," said Jean Theis, vice president of operations at the \$860-million credit union. "The system will be key in helping us streamline our lending process for faster turn times in delivering an outstanding member experience."
